296%

GSM-R in the global market

- **Rail has freedom of technology choice**
- **GSM-R recognised as safe option**
- **Today:**
 - › most GSM-R contracts are awarded outside of Europe
 - › Most GSM-R tender announcements outside of Europe

GSM-R for Australia metropolitan line

Customer

Location: **Metropolitan line Sydney**
GSM-R solution: **Huawei**
Dispatcher Subsystem: **FREQUENTIS**
Cab Radios: **funkwerk**
aktiengesellschaft

GSM-R advanced features applied

- **Frequency 1.800 MHz**
 - use of standard 3GPP chipsets
 - Spectrum availability for rail customer
- MSC Dual-homing
- Distributed BTS
 - 70 km of tunnel coverage
 - 32 tunnels in Sydney
 - 43 tunnels in outskirts

GSM-R for Etihad Rail Project, UAE

Customer

Telecom Sub-System Integrator: **Selex ES**
GSM-R solution: **Huawei**
Cab Radio: **KCC**
Next generation IP based dispatcher: **SIEMENS** Siemens CVC
End Customer: **Etihad Railway**
Length: **260km**

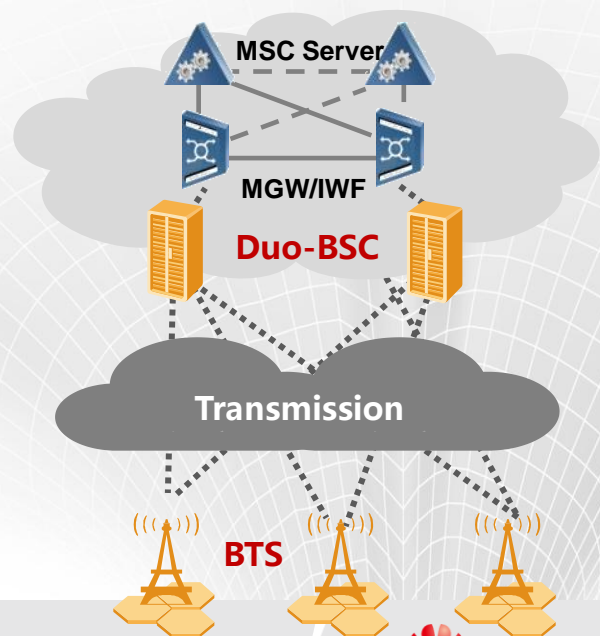

UAE RAILWAY NETWORK

- First phase Section 1
- First phase Section 2
- Planned network

GSM-R advanced features applied

- Duo-location BSC**
- MSC Dual-homing
- ETCS L2 line

GSM-R Flat Shunting Voice & Data

Xinfeng shunting yard China 1/2

Customer

Location: **Xi'an city**
GSM-R solution: **BSS: Huawei**
NSS: European GSM-R

supplier

Project background

- Xinfeng nerve center of cargo transport
- tens of loco's simultaneously running in shunting yard
- only 4MHz GSM-R bandwidth
- Voice and Data services transmitted in parallel in VGCS
- Requirement specification finalised in 2006
- In rail operation since 2010

GSM-R Flat Shunting Voice & Data

Xinfeng shunting yard China 2/2

Customer

Location: **Xi'an city**
GSM-R solution: **BSS: Huawei**
NSS: European GSM-R

supplier

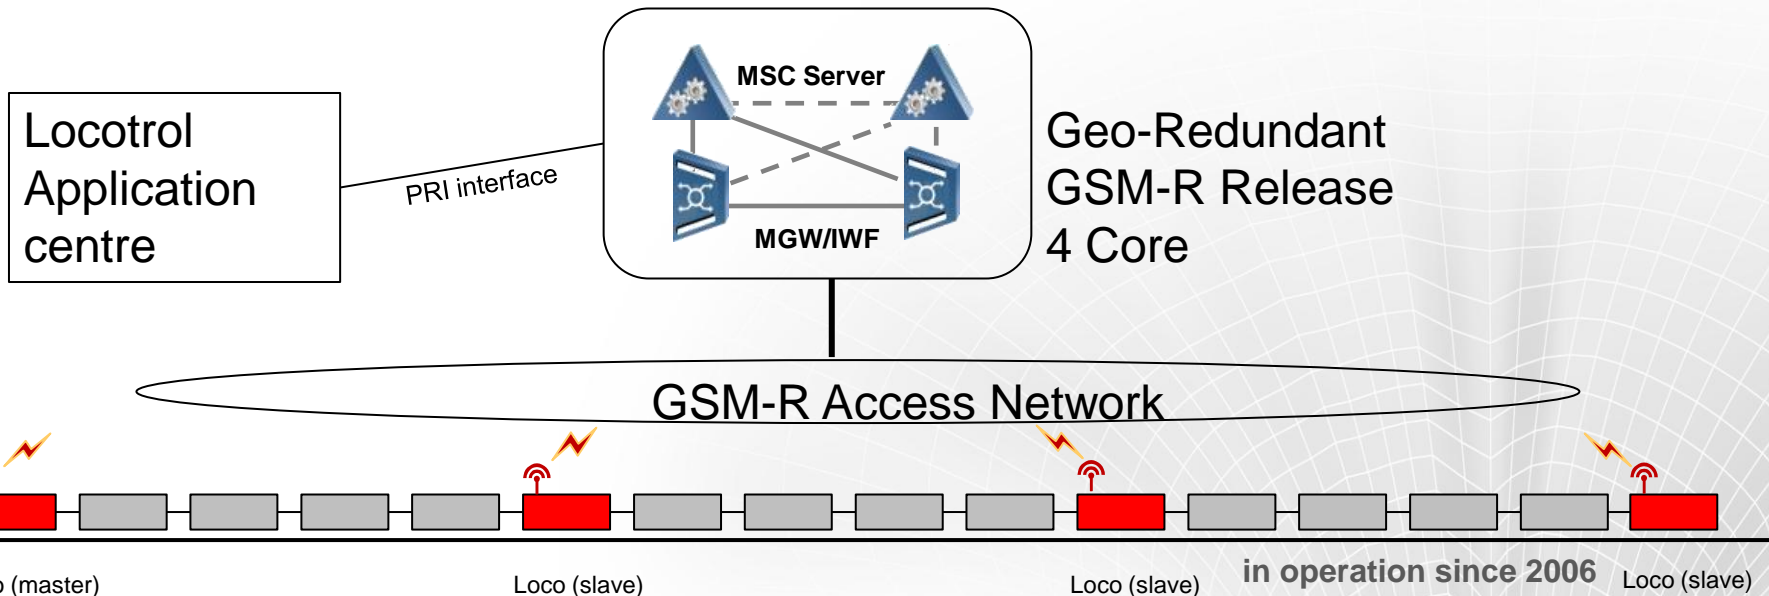

Technology applied

ETSI: **3GPP TS 43.068: "Voice Group Call Service (VGCS)"**
3GPP TS 44.018: "Mobile radio interface layer 3 spec"
3GPP TS 48.008: "MSC-BSS interface "
FACCH signalling
SMD (Short Message Data) service

Flat Shunting Features

- Receive "**Work Order**" of current shunting task
- **500ms data transfer** delay
- Data supported in **all states of VGCS** call (PTT, idle, talker change, talker, listener...)
- Shunting **cab radio display** "state of signal" controlled through data service by pre-defined shunting members (i.e. leader..)
- typical use cases : **Link assurance & emergency break**
- Automated **voice announcements** of emergency break status (i.e. originator) to all group members
- Flat Shunting initiation, acknowledgements and states are **recorded and stored** by equipment for post incident analysis

GSM-R Locomotive Synchronisation Daqin Freight Line, China

**200% freight capacity increase thanks to Locomotive control system
and GSM-R CSD**

GSM-R distributed BTS

Eskişehir Kütahya Balıkesir Line, Turkey

Customer

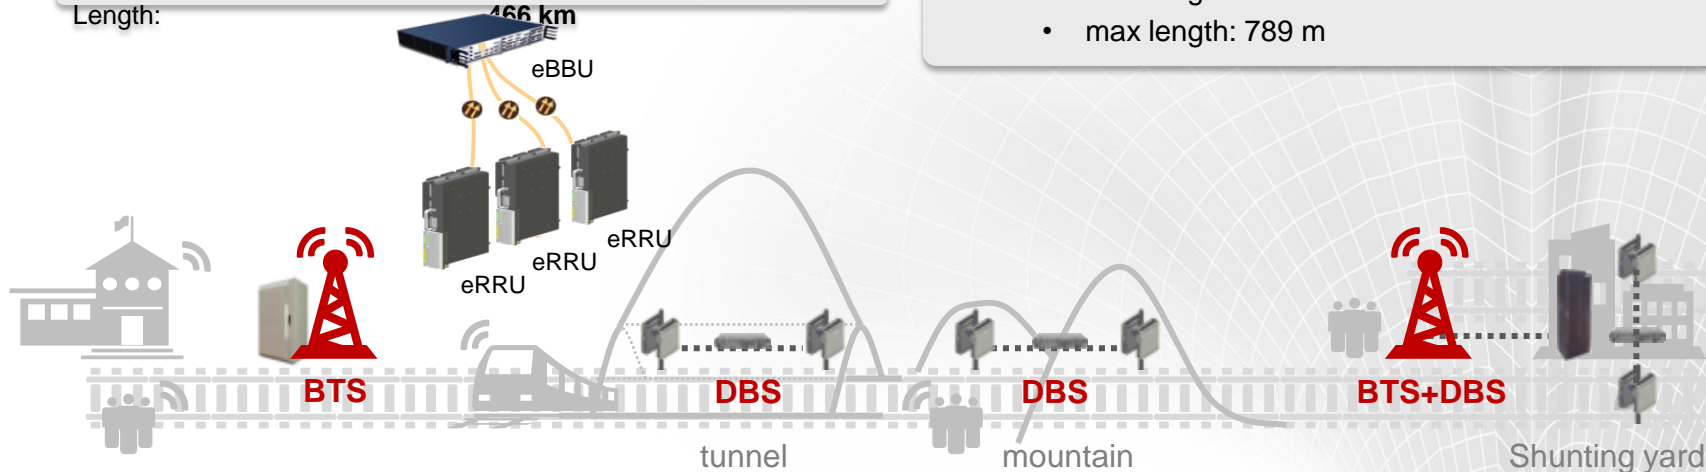

Location: TCDD, Turkish Railways
Integrator: ALSTOM
GSM-R solution: BSS: Huawei
NSS: European GSM-R

supplier

Length:

GSM-R features applied

- ETCS L2 ALSTOM
- Multi Vendor Integration
- **Distributed BTS**
 - 42 tunnels
 - total length: 7100 m
 - max length: 789 m

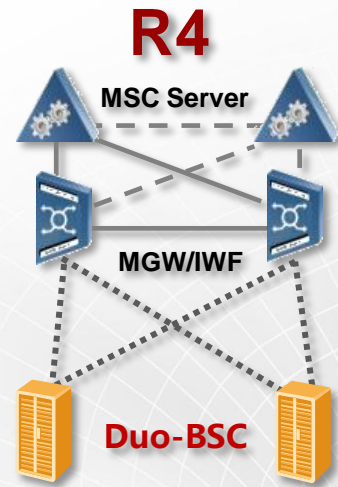

R4 GSM-R core for CTCS L3 Harbin-Dalian highspeed line, China

Customer	
Location:	MoR, Chinese Railways
GSM-R solution:	NSS/BSS: Huawei
CTCS L3 solution:	Bombardier
Length:	895 km
Put into rail operation:	December 2012

GSM-R features applied	
•	CTCS L3 design speed 350 km/h
•	QoS according to ERTMS
•	Permafrost, high-altitude environment
•	Geo-redundant R4 MSC's
•	First R4 GSM-R core on operational CTCS L3-ETCS L2 line

RINA

Analysis of the equivalence between ETCS-L2 and CTCS-L3, in terms of requirements related to GSM-R

Document Code	2013QTL48 REP_CCS_01		Nb. of pages	144
Contract	2013QTL48	Customer	HUAWEI	
Revision	Date	Editing	Approval	Authorization
1.0	05/07/13	Federica Forzani Peng Zhang	José María Cervelló Zhang Peng	

Conclusion

- **Strong demand and utilization of GSM-R outside of Europe**
- **UIC vital role to promote GSM-R and its evolution**
- **Promotion campaigns in Central Asia, South America and Africa would help the continuation of this success**

HUAWEI

BE EVOLUTIONARY
